

WILLIAM TURNER

Carbon Footprint Policy Statement

April 2025

Carbon Footprint Policy Statement

William Turner Ltd is committed to minimising its environmental impact and playing an active role in addressing climate change. Reducing our carbon footprint is a key part of our sustainability strategy, contributing to improved operational efficiency and a healthier planet.

We recognise the urgent need to cut greenhouse gas emissions and are working towards achieving a meaningful reduction in our carbon footprint over the next 4–5 years. This commitment aligns with our broader goals for environmental responsibility and long-term business resilience.

To deliver on this commitment, William Turner Ltd will:

Comply with all relevant environmental and energy legislation, aiming to meet or exceed regulatory targets.

Reduce energy use and emissions across all operations through improved efficiency, investment in sustainable technologies, and process optimisation.

Minimise waste generation, promote the use of recycled and recyclable materials, and reduce reliance on landfill.

Promote environmental awareness among employees, suppliers, contractors, and stakeholders, encouraging best practices and

innovation across the supply chain.

Reduce travel-related emissions, including adopting remote communication tools and supporting sustainable commuting options.

Explore credible carbon offsetting initiatives, such as tree planting or renewable energy projects on company-owned land.

Invest in site upgrades and infrastructure improvements to support long-term carbon reduction goals.

Expect our partners and suppliers to uphold similar environmental values, including having clear, measurable carbon management plans.

Our carbon footprint strategy will be regularly reviewed and updated to ensure it remains ambitious, measurable, and aligned with evolving best practices and climate science.
